

Job Description: Drainage – Water Resources Engineer

Holt Consulting Company** (Holt) is a multi-discipline engineering firm that provides planning, design, and management services for transportation infrastructure. Holt's relationship-based culture coupled with responsive communication and action makes us the consultant of choice for state and local governments. Our founders learned transportation consulting from the ground up; from performing the work to managing a wide variety of projects and programs. As a result, they possess a keen awareness of the attributes of highly successful projects: attention to quality, timely execution of the work, and communication, with the ultimate goal being to exceed client expectations.

Here at Holt, employees are the Firm's most valuable asset. We are committed to an environment that fosters teamwork, provides opportunities and challenges for each employee to grow and reach their full potential, and recognizes and rewards them for their accomplishments, contributions, and outstanding performance. This type of environment generates a naturally self-motivating atmosphere, which results in a genuine desire by each employee to give the client 110%.

Holt is seeking a highly motivated Drainage/Water Resources Engineer who will be responsible for design efforts for transportation infrastructure and development projects. Tasks will include, but are not limited to, preparation of technical studies and reports, engineering design concepts, construction plans, specifications, opinions of construction costs, and assistance during construction phase services including field observation.

Qualifications:

- Bachelor's Degree in Civil Engineering or related field
- 4+ years of previous drainage and/or water resources experience
- Licensed Professional Engineer in SC, GA, or NC, or the ability to become licensed is preferred.
- Perform design and coordinate drainage preparation of plans and details using AutoCAD/Civil-3D, MicroStation, Bentley Design Software, GeoPAK Drainage and MS Office.
- Demonstrated work experience with hydrologic and hydraulic computer programs including HEC-RAS, HEC-HMS, HY-8, SWMM, and ArcGIS.

A successful candidate will have a thorough knowledge and application of all FHWA and state DOT design standards and specifications and the ability to balance the need for independent and collaborative efforts. Candidate should possess the ability to solve problems using sound professional judgment, creativity, and innovation.

This position will primarily work in an office setting; may require some travel and field work.

Holt Consulting is an Equal Opportunity Employer**
